We're doing this to make healthcare better for you.

Healthcare can be confusing. Change will make the process better for everyone. Not only will it transform lives here at home. What we do here can become a standard of care for the nation. In Delaware, we have the opportunity to be leaders in health reform. Our state has the leadership, focus and intent to move this work forward, resulting in a model of care that will transform lives here at home—and potentially become a standard for the nation.

What are the key goals?
You'll benefit as we:

- Improve the health of every Delawarean
- Make healthcare access better
- Offer doctors and other healthcare providers better tools to manage care
- Improve the quality and lower the costs of healthcare services

What will accomplishing these goals mean to you?

Healthcare will be more integrated and more patient-centered. Every Delawarean will have patient-centered care coordinated through a single provider.

Insurance companies and healthcare providers will work together to meet common goals. Programs and tools will be introduced to make sure everyone is working to improve care coordination and overall quality.

Consumers and patients will have input into any decisions that affect them. Hearing from the people of Delaware is important. As a result, the people leading the Innovation Movement can consistently look at the work they are doing in the perspective of patients and consumers.

If you would like to become involved, just email us at regoeshere@address.com.
